

Test suite title	Test case id	Title	Description	Precondition	Step Number	Test Step	Expected Result	Actual Result
Desktop Test Cases	1	Display Drop-down Menu on Desktop	Verify that the drop-down menu appears when the profile icon is clicked on desktop.	User is logged in; profile icon is visible.	1	Click on the profile icon.	A drop-down menu with options: "Edit Profile," "Settings," and "Log Out" appears below the profile icon.	Pass
	2	Navigation to Edit Profile on Desktop	Verify that clicking "Edit Profile" navigates to the profile editing page on desktop.	Drop-down menu is visible.	1	Click on "Edit Profile" in the drop-down menu.	The user is redirected to the profile editing page.	Skipped
	3	Navigation to Settings on Desktop	Verify that clicking "Settings" navigates to the profile settings page on desktop.	Drop-down menu is visible.	1	Click on "Settings" in the drop down menu.	The user is redirected to the profile settings page.	Skipped
	4	Display Log Out Confirmation Modal on Desktop	Verify that clicking "Log Out" shows a confirmation modal on desktop.	Drop-down menu is visible.	1	Click on "Log Out" in the drop down menu.	A modal window appears, asking the user to confirm or cancel logging out.	Skipped
	5	Confirm Log Out on Desktop	Verify that clicking "Confirm" in the log-out modal logs the user out and redirects to the login page.	Log-out confirmation modal is visible.	1	In the modal window, click "Confirm."	The user is logged out and redirected to the login page.	Skipped
	6	Cancel Log Out on Desktop	Verify that clicking "Cancel" in the log-out modal keeps the user logged in and closes the modal.	Log-out confirmation modal is visible.	1	In the modal window, click "Cancel."	The modal window closes, and the user remains on the current page.	Skipped
	7	Keyboard Navigation on Desktop	Verify that the user can navigate through the drop-down menu using keyboard arrows or Tab key.	Drop-down menu is visible.	1	Click on the profile icon and press Tab key.	The drop-down menu appears with "Edit Profile" as the first highlighted item.	Pass
					2	Press the down arrow key to navigate to "Settings".	"Settings" option is highlighted.	Pass
					3	Press the down arrow key to navigate to "Log Out".	"Log Out" option is highlighted.	Pass
					4	Press the up arrow key to return to "Settings".	"Settings" option is highlighted.	Pass
					5	Press the up arrow key to navigate back to the previous option.	"Settings" option is highlighted again.	Pass
Tablet Test Cases (Focus on UI Adaptation and Layout)	8	Display Drop-down Menu on Tablet	Verify that the drop-down menu appears correctly on a tablet device when the profile icon is clicked.	User is logged in; profile icon is visible; portrait orientation is set	1	Open Adminpanel on a tablet device.	The application loads in tablet view with the profile icon visible.	Pass
					2	Click on the burger menu in the left corner of the Header	The Sidebar is displayed.	Pass
					3	Click on the profile icon.	1. A drop-down menu with options: "Edit Profile," "Settings," and "Log Out" appears below the profile icon without clipping. 2. The Drop-down menu is displayed in the right edge of the screen.	Fail
					4	Chenge the tablet orientation into landscape.	The Drop-down menu is displayed in the right edge of the screen.	Fail

	9	UI Consistency on Tablet with Site Theme Switcher	Verify that the drop-down menu is styled consistently according to the website's theme settings on a tablet device.	User is logged in; profile icon is visible; the website theme is preferred over device theme settings.	1	Open Adminpanel on a tablet device in default (Light) website theme mode.	The application loads in tablet view with the profile icon visible and default theme applied.	Pass
					2	Click on the profile icon.	The drop-down menu appears below the profile icon, with all options clearly visible in default Light mode.	Pass
					3	In the website's theme settings, change the theme to Dark mode using the theme switcher.	The website switches to Dark mode, and all UI elements, including the drop-down menu, adapt to the Dark mode color scheme.	Pass
					4	Click on the profile icon.	The drop-down menu appears below the profile icon, with all options clearly visible in Dark mode, consistent with the website theme.	Pass
					5	Switch the device theme to Dark mode in the tablet's system settings (OS theme).	The website retains its Dark mode theme as selected, regardless of the device's OS theme setting.	Pass
					6	Click on the profile icon again.	The drop-down menu remains visible in the website's Dark mode, unaffected by the device's OS theme setting.	Pass
					7	Return to the website's theme settings and switch back to Light mode.	The website switches back to Light mode, with all UI elements adapting to the Light mode color scheme.	Pass
					8	Click on the profile icon.	The drop-down menu appears below the profile icon, clearly visible in Light mode, consistent with the website theme.	Pass
	10	Responsive Layout on Tablet	Verify that the drop-down menu layout adapts properly on tablet view.	User is logged in; profile icon is visible.	1	Resize the tablet screen to portrait and landscape modes.	The drop-down menu repositions itself appropriately, without clipping or overlapping other elements.	Fail
Mobile Test Cases (Focus on Responsiveness and Touch Interaction)	11	Display Drop-down Menu on Mobile	Verify that the drop-down menu appears correctly on mobile when the profile icon is tapped.	User is logged in; profile icon is visible.	1	Open Adminpanel on a mobile device.	The application loads in mobile view with the profile icon visible.	Pass
					2	Tap on the burger menu in the left corner of the Header	The Sidebar is displayed.	Pass
					3	Tap on the profile icon.	A drop-down menu with options: "Edit Profile," "Settings," and "Log Out" appears below the profile icon.	Pass

					4	Change the device orientation into landscape.	The Drop-down menu is displayed in the right edge of the screen.	Fail
	12	Log Out Confirmation on Mobile	Verify that a confirmation modal appears on mobile when "Log Out" is tapped.	Drop-down menu is visible on mobile.	1	Tap on "Log Out" in the drop-down menu.	A modal window appears on mobile, asking the user to confirm or cancel logging out.	Skipped
	13	UI Consistency on Mobile with Site Theme Switcher	Verify that the drop-down menu is styled consistently according to the website's theme settings on a mobile device.	User is logged in; profile icon is visible; the website theme is preferred over device theme settings.	1	Open Adminpanel on a mobile device in default (Light) website theme mode.	The application loads in mobile view with the profile icon visible and default theme applied.	Pass
					2	Tap on the profile icon.	The drop-down menu appears below the profile icon, with all options clearly visible in default Light mode.	Pass
					3	In the website's theme settings, change the theme to Dark mode using the theme switcher.	The website switches to Dark mode, and all UI elements, including the drop-down menu, adapt to the Dark mode color scheme.	Pass
					4	Tap on the profile icon again.	The drop-down menu appears below the profile icon, with all options clearly visible in Dark mode, consistent with the website theme.	Pass
					5	Switch the device theme to Dark mode in the mobile device's system settings (OS theme).	The website retains its Dark mode theme as selected, regardless of the device's OS theme setting.	Pass
					6	Tap on the profile icon once more.	The drop-down menu remains visible in the website's Dark mode, unaffected by the device's OS theme setting.	Pass
					7	Return to the website's theme settings and switch back to Light mode.	The website switches back to Light mode, with all UI elements adapting to the Light mode color scheme.	Pass
					8	Tap on the profile icon.	The drop-down menu appears below the profile icon, clearly visible in Light mode, consistent with the website theme.	Pass
	14	Responsive Layout on Mobile	Verify that the drop-down menu layout adapts properly on mobile view.	User is logged in; profile icon is visible.	1	Rotate the mobile screen between portrait and landscape orientations.	The drop-down menu resizes and repositions appropriately, without clipping or overlapping other elements.	Fail
	15	Touch Interaction on Mobile	Verify that the drop-down menu is easy to interact with using touch controls.	User is logged in; profile icon is visible.	1	Open Adminpanel on a mobile device and ensure the profile icon is visible on the screen.	The profile icon is visible and accessible on the mobile screen.	Pass
					2	Tap on the profile icon to open the drop-down menu.	The drop-down menu appears below the profile icon, with options: "Edit Profile," "Settings," and "Log Out."	Pass

					3	Try tapping on each menu item one at a time, starting with "Edit Profile."	The application navigates to the profile editing page when "Edit Profile" is tapped, without accidental selection of other items.	Pass
					4	Return to the previous screen, tap the profile icon again, and tap on "Settings" in the drop-down menu.	The application navigates to the profile settings page when "Settings" is tapped, with clear response to the touch input.	Pass
					5	Return to the previous screen, tap the profile icon once more, and tap on "Log Out."	A confirmation modal appears, confirming the touch response for "Log Out" was correctly received.	Pass
					6	In the confirmation modal, tap "Cancel" to close the modal.	The modal closes, returning the user to the previous screen. No accidental log-out occurs.	Skipped
					7	Repeat Steps 2-5, testing with light taps, regular taps, and slightly longer presses on each menu item.	The drop-down menu responds accurately to all touch variations, with no accidental selections or UI overlaps.	Pass
					8	Close the drop-down menu by tapping outside of it.	The drop-down menu closes, indicating responsive interaction with the mobile screen.	Pass
